ABSTRACTED-PUB-NO: DE 4339709A

BASIC-ABSTRACT:

The multi-layer needle-bonded non-woven or felting material has a carrier of high tensile strength and at least one layer of staple fibres needle bonded to it. The carrier (3) is prepared, before bonding with the

staple fibre layers
(1,2), as a drawn staple fibre non-woven of bicomponent
fibres. After needle
bonding, the material is heated with simultaneous pressing.

USE - The multi-layer material is used for conveyor belting
or as a filter
medium.

ADVANTAGE - The material has a low stretch and a high shear
strength.
